

Record to internal disks on cavsi2 i.e. setup centre frequency on FREQ2 of ATCA

use antennas 12345 in CATIE

Default polarisations ok in CATIE

Schedule has started around 1:40 UT after running cacal on 0208-512. In the beginning Orion maser was not seen on auto spectrum for the disk recorded data, but finally seen after switching catie from the tied rray to only one antenna (4) at around 2 UT. We keep one antenna mode to avoid phase error.
