LECTURE NOTES

These notes are to be printed as a book in the Astronomical Society of the Pacific's Conference series. Because of this, we ask that these notes are **not** reproduced further. We thank the society for allowing us to copy the notes ahead of their publication.

The notes included here consist of only about half of those that will be in the final book, and they are only an initial draft at that. The final book will also cover a number of more advanced topics as well as topics more relevant to the VLA than the ATCA.
The ATNF will be making a bulk order of the books which it will be buying at US$40/copy plus (bulk) postage. We will then sell these, at cost, to workshop attendees.

If you wish to order, please fill in the details below and give to a member of the LOC.
(Or mail to ATNF Synthesis Imaging Workshop, C/O Joanne Houldsworth, ATNF/CSIRO Paul Wild Observatory, Locked Bag 194, Narrabri NSW 2390)

We recommend that overseas attendees contact the ASP direct, either at

Astronomical Society of the Pacific, Order Department,
390 Ashton Ave, San Francisco, CA, 94112 USA

or via http://www.aspsky.org

ATNF SYNTHESIS IMAGING WORKSHOP
ORDER FORM

Please reserve for me one copy of the ASP Conference Series book on Synthesis.

I understand the cost of the book will be US$40 plus any postage costs involved, and that you will advise me of the full cost when the book becomes available.
