

Director's update

Douglas Bock | 22 April 2020

Australia's National Science Agency

Vision

We will operate world-class radio astronomy facilities for users from across Australia and around the world. We will be global leaders in technology and research, exploiting the world's premier radio quiet site. We will attract and retain the best staff.

Mission

To develop and operate world-class National Facilities in radio astronomy.

- Financially viable and user-focussed research facility.
- Play key roles in the SKA.
- Deliver world-class science.
- Develop, apply and commercialise our technologies and techniques.
- Foster a diverse and creative workforce.
