

IUCAF Spectrum School -- Santiago, Chile -- 7-13 April 2014  
=====

2ND ANNOUNCEMENT - (19 Feb 2014)  
=====

The 4th IUCAF School on Spectrum Management offers a comprehensive view of both technical and regulatory issues related to radio astronomers' use of the spectrum. Spectrum management is a task of rapidly growing importance, for radio astronomy as well as for other radio services; however, it is not part of any academic curriculum; radio astronomers have to learn it by doing it. The IUCAF School in Spectrum Management will be an opportunity to profit from the experience of colleagues.

Details of the Purpose, Program and Organisation of the school have been updated on the school website at <http://www.iucaf.org/sms2014/>

All the organisational details for the school such as registration, program, hotels, ALMA tour etc are now complete. If anything is missing please let the organisers know. A brief summary of the changes is given here.
