New trends in outreach

Julieta Norma Fierro Gossman, Julieta Norma Fierro Gossman

Instituto de Astronomia, UNAM

We must find new ways to convey astronomy since know all information is available on the web. New skills must include understanding, using hands, creativity, and art. Students must have a clear idea of what is expected from them and they should discover whom they are in order to achieve their educational goal. Astronomy is an excellent way to convey knowledge due to its multidisciplinary nature and people interested in outreach should take advantage. Stories are a great way to convey astronomy to the public, so is dance and other artistic expressions.
