

astronomy Themed Beverages

PART III

'Good-bye' Co-Learnium

Jimi Green | 23rd June

Definitions reminder!

What is a beverage (for the purposes of this talk):

Water + Malt + Hops + Yeast

What is Astronomy (for the purposes of this talk):

Astronomy, Physics, Electronics, Engineering, Science Fiction

I have to have tried them! (total 2180 different brews and counting)

Thinking

How to present
a bunch of
beers again and
try and keep it
interesting?

Part 2 of this
'epic' trilogy
was presented
in Nov 2019

What's
changed in this
time?

Global Pandemic

- Virtual & hybrid meetings..
- Online tools...
- 'sorry cant find the mute button'
- Working from home...
- Cats, dogs, children, 1000s memes

Global Pandemic: less flights

- Atmospheric improvements from less flights!
- Innate Brewers Troposphere Pale Ale
- Pale Ale:
 - Pale malt
 - 'hop-forward' (= flavours out of balance towards the hops)
 - Moderate strength

Global Pandemic: lockdowns

Brown/dark malt
from 18th century London, popular
with the street/river 'porters'

India Pale Ale
Typically hoppier than pale
Traditionally brewed stronger

Global Pandemic: mindsets

No Brown/dark malt of normal stout, instead flavours (coffee, cacao, vanilla)

Brewed with renewable energy!

Knowledge of our Galaxy

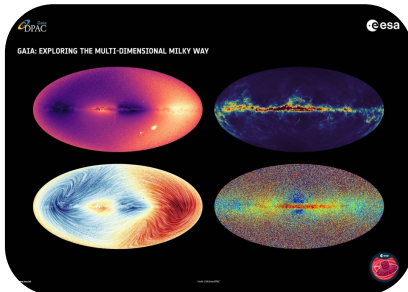

Sgr A* via Event
Horizon
Telescope

Event Horizon Telescope

GAIA Data Release 3 –
astrometric parallaxes for 1.46
billion sources

Knowledge of our Galaxy

Galaxy hops: Australian breed of hops with citrus, peach, passionfruit flavours

Sour style: intentional bacteria! (Lactobacillus, Pediococcus, Brettanomyces)

Space & Astronomy People

- Name changed, CASS -> S&A
- Various personnel changes

Space & Astronomy People

Red ale: pale ale with kilned malts (germinated barley heated to dry -> boost flavours) + roasted barley

Nowhereman X Luna Pale Ale

SPACE

Continued to grow in prominence

Got more crowded – more RFI to manage

James Webb Space Telescope Launched

(1st pics due 12th July!)

S&A space-craft tracking growing

Innate Brewers Space Juice
Double Hazy IPA

Amundsen Chuggernaut
New England IPA

ENGINEERING - CRYOGENICS

From uncooled to cooled
Phased Array Feeds!

Coming soon to a 64m radio telescope near you

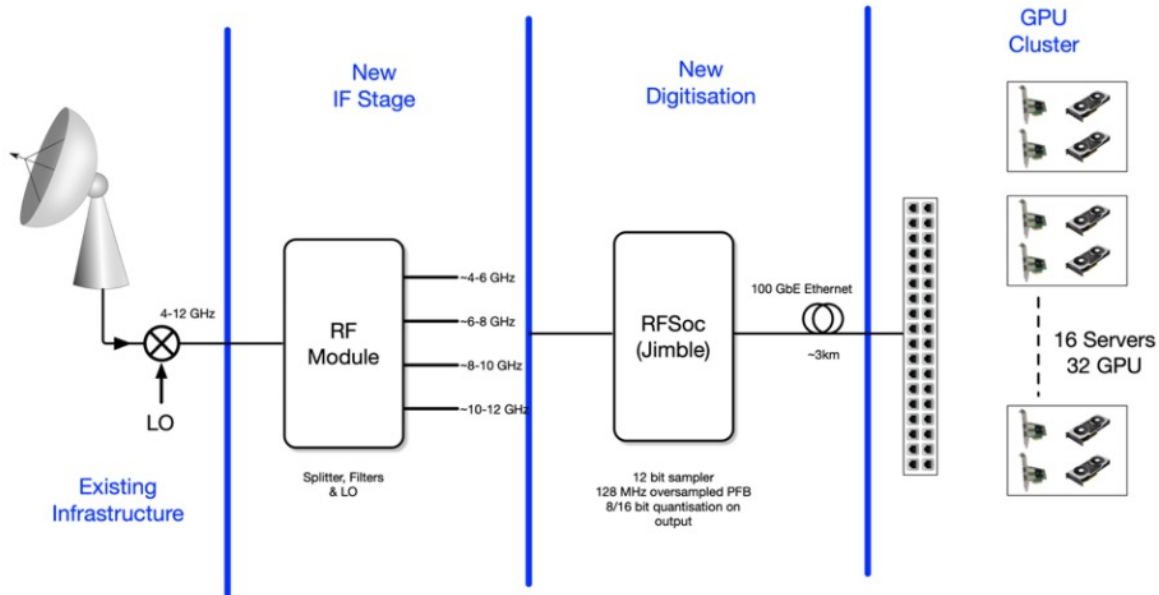

ENGINEERING - CRYOGENICS

- Cryo hops! – extract and pelletise lupulins from hops
- Lupulins are flavourful yellow stuff within the green stuff of hops
- Net result cryo-hops = stronger more intense hop flavours

Correlator upgrade for ATCA:

“Broadband Integrated GPU Correlator for ATCA Telescope”

Closest to 'BigCAT' could get..

- MASH Brewing 'Red Cat' Red IPA

'Astrologers' and Constellations

Kaiju Betelgeuse
double red ale
(10%)

Solar activity

Deeds X Sauce Brewing
Collaborative Hazy Double IPA

- A stars photosphere – visible surface/deepest layer of the sun that we can see (below chromosphere) – sun spots and flares

- Heading for solar peak in 2025, coronal mass ejection on 13th June captured by NASA's Solar Dynamics

New Star Wars Entries!

The Mandalorian

The Book of Boba Fett

Obi Wan Kenobi

+ THE BAD BATCH, STAR WARS VISIONS, MORE CLONE WARS

Nail Brewing Skywalker Golden IPA

Dainton Brewing 'Darklord' Imperial Stout

The Haze of Revan Black NEIPA

..and, like George Lucas has been known to do,
a Star Wars Edit !

Jedi Juice with Leia's hair buns became J-Juice without Leia's
hair buns

Miscellaneous Extras!

Liverpool FC *almost* won a quadruple

Premier League ☹️
Champions League ☹️
FA Cup 😊
League Cup 😊

Quadruple/Quadrupel Beers!

Strong:
~9 -> ~14% abv

<- 4 times the
hops IPA

Belgian style
“Quadrupel” ->

Low- / Non- Alcoholic

Little Bang Brewery 'Spacer' Alcohol Free (<0.5%) American Pale Ale

- Addition of hops late in process gives full flavour without the alcohol
- Traditionally low/non-alc produced by heating off the alcohol – but this can dissipate flavours (yucky taste!)
- Now:
 - Steam distillation (lower temp in vacuum)
 - reverse osmosis (high pressure and membranes)
 - Water vapour/Gas stripping
 - restricted fermenting (via sugars or yeast strains)

Where to next?
