Correlation notes

Output files:

Pass	File name	Description	Start date, UT range	Antennas	Polarizations	# subbands (AIPS IFs)	Bandwidth per IF (MHz)	Spectral channels per IF/pol	Corr. int. time (s)
v252bi	V252BI.FITS		2017-06-15, 0/21:28:01 - 1/22:00:59	AT CD HH HO KE MP PA TD TI WW YG	RR LL RL LR	2	16.0 MHz	64	1.0

At: bandpass problem in subband 1/2 RCP gives reduced sensitivity.

Mp: Stowed ~ 00:35-03:00 to fix vacuum problem on mm Rx.

Cd: Power outage required running on backup power. Most scans between 01:30-02:51 were missed. Slow slew speed thereafter results in later than expected onsource time. See the flag file.

Ti: DSS36 from 02:41 to 09:10:14. RCP in all channels from 02:41-02:59. Dual pol thereafter.

Correlator: Some sources appear to have very poor a priori positions. A spectral resolution of 0.25 MHz and integration time of 1 sec has been used to compensate for this.

Analysis notes: v252bi
