

Planning for the next DiFX meeting

In view of the pandemic, a “mini-series” of virtual short workshops is planned to replace a physical DiFX workshop in 2020. The first of these will be held on the week on November 16 and will cover the topic “Migration from SVN to git: worth the pain?”. An exact date and time will be promulgated soon. The first meeting will also include a discussion on dates, times, and topics of the remaining mini-workshops. Future topics may include:

- Production issues in DiFX (essentially, “things that have caused trouble”)
- Complex sampling
- Release planning
- GPU acceleration
- Output Bands? (Jan)
- PolConvert / other support of mixed polarisation correlation? (Geoff, assuming I find time to do a bit more work, and Leonid)
- Near-field correlation (request from Stuart/Guifre)
- Other suggestions

Meetings will be held via zoom and recordings will be made available afterwards.

Next mini-workshop

[2020 Mini-workshop #4 \(Feb 19, 2021\)](#)

Past mini-workshops

- [2020 Mini-workshop #3 \(Outputbands: a new way to slice and dice DiFX visibilities, Jan 28, 2021\)](#)
- [2020 Mini-workshop #2 \(Mixed-polarisation correlation and post-correlation in DiFX, Dec 1, 2020\)](#)
- [2020 Mini-workshop #1 \(SVN to git, November 16 2020\)](#)
