

## XRAID and removable disks sorted by Observatory

This page shows only xraid and removable disks currently in the vlbi pool, ~~and should be updated regularly during VLBI observing.~~

Note added 23-June-2011: With recorder monitoring in place, the purpose of this page is mainly to keep track of the location of disks.

Disk ID	Former ID	Size (GBx7)	Current Location	Status	Station(s)	Experiment(s)	Damaged disk	Mounted in	Session	Date updated
<b>ATCA</b>

## Form values

### Location

<Telescope> (online), <Telescope> offline, transit <from> → <to>

### Status

Empty, Formatting, to be correlated, to be cleaned, partially correlated, waiting for verification

### Damaged disk

none, one or more of A1, A2, ..., B1, B2.. B7

### Date updated

date that the information for that table row was last updated
