

Observer = PGE

Copied rk08up.sch (C-band) to rk08up2.sch and adjusted freqs to K-band. Do first 10 minutes with Mopra at K-band, before switching to C-band.

(My mistake, I was confusing this run with a run the previous night where we changed Mopra from C-band to K-band. But it might be a useful check of K-band fringes between ATCA and Mopra.)

Mopra ~1 minute late getting on source: Good data from 15:01:30UT

Recording to mpvsi2:/data/xraid1 CURT V002B
