

Recording DAS1 to pam-store:/data.

Recording DAS2 to the local Xraids on cavsi2.

At around 2230, Parkes experienced some sort of drive/TPS failure and went offline while Ettore took a look at it.

Last few hours recorded from DAS2 onto /data/removable. This had a few bigbuf glitches so swapped to pkvs1:/data/xraid0 at 02:40 UTC. This totally stuffed both recorders.... Reverted to local recording at 02:45 UTC
