

Recording to pam-store:/data

The observing servers crashed at approximately 13 UTC, and this required a bit of messing about to get it back on source again. Did so at around 1320, on lagavulin rather than joffrey (thanks to JR).

Parkes finished schedule at 1545. It continued to track 1921-293 until 1555 when the disk automatically parked itself. Recording was stopped soon after.
