

Recording DAS1 to UTAS V001B (/data/xraid1 on cavsi1).

Tied array is 12345, reference antenna is CA03 on W147.

The array is in a 6km configuration, so the tied array beam will be very small, but phases are quite stable.

The antennas hit the North wrap limit at 13:31:30, were back on source in South wrap at 13:41.
