

Phased CA01-04 Not using CA05. Reference antenna CA02

Recording onto UTAS V002A

13:20 UT. Phases very noisy. Tsys up to 500k! Humidity 98%. Seeing monitor pathlength 2000! Rain? ATCA data very poor...

14:18UT rephased array. Phases better. Tsys still over 200K!

16:18UT rephased again. Corrections of 50+ degs...

19:45UT rephased again. spread was ~100deg before calibration

22:00UT rephased again. phases are diverging with monotonous regularity...
