

Mopra recording locally to /data/xraid1 (CURT V002B)

Occasional GTP/SDO out of range on IF2 around UT2330. Raining at Mopra and the Tsys is going up and down. Again at UT2345, changed some attenuator settings, hopefully this is more robust against the variations now.

Changed to /data/xraid0 (CURT V002A) at UT0100.

Several windstows due to storms in the period 0200 - 0300

Windstowed again for a while around 0500.
