

Mopra on VLBI at 04:30UT.

Issue with clock offset of 1.7 secs! ntp not running!

No telescope issues through run. Schedule remade as vx016a1_Mp.com to resolve differences with correlator schedule. vx016a was overwritten and restarted as vx016a1 at 13:20UT which did not exist! Mp stayed with old schedule until 14:00UT.
