---

Recorded to SWIN V009 A1-A7.

Shaun notes that I think you are **actually** recording to ATNF V009 B1-B7.

---

Mopra ran on a copy of vsop.pro due to an overwritten vsop\_n.pro file. Data ok but whole band needs to be flipped for correlation

Correct vsop\_n.pro started at approximately 00:56 UT. Need to account for it at the correlator.

Some data missed in first 2 hours due to testing and restarts. Probably only ~1/2 hr total missed.
