Comments:

This is a disk based experiment. Do NOT delete the data after recording!!!!

This setup uses both IFP's on the DAS (2 channel per IFP)

Connect DAS directly to VSIC

Record on /data/removable or /data/xraid as appropriate

In disko use record mode "Channels 1-4"

ATCA: Please make sure you observe 5-10 minutes on 1934-638 before the start of the experiment to allow calibration of the ATCA data. Preferably do this *before* vt02f7.

Observing comments for each antenna:
