## Comments:

**This is a disk based experiment. Do NOT delete the data after recording!!!!**

Record on /data/internal

Connect DAS directly to VSIC

NB. The period till 12:30UT is for fringe checking. Please record under a fictitious VC00x experiment code, so the files go to FringeCheck subdirectory. These will be cleaned to make more space.

Recording under VX011 should start at about 12:30UT, or later if fringes have not been found.

## Observing comments for each antenna:
