

Ak schedule does not start till 09:07 as sources are below horizon before then.

Telescope did not go to source till about 09:16:30UT. Schedule was running but telescope was not tracking. Had to do a restart.

Data recording started 09:00:34. But recorder gives occasional warnings of high RMS errors and buffer problems. Restarted recording 09:26:01. Warnings persist.

Stopped recording 09:54:01UT. Restarted px14400 kernel driver. Back recording 09:54:29UT

Antenna drive crashed, sometime between 11:05-11:13UT. Recovered 11:33UT. Also buffer warnings from recorder... Reset and restarted recorder 11:42:37-11:42:54 UT.
