

Using DAS profile 64MHz_n.pro

Using DAS 2 for this experiment since DAS 1 seems to have a problem channel (probably in the VSIC though as we don't see this problem when using Huygens mode).

Recording to cave-store:/data2

ATCA got on source 1934-638 a little late since caobs went a bit crazy when asked to point at a source below the horizon, and no sources further in the schedule were above the horizon either.
