

With CABB in hybrid continuum and VLBI mode, it is possible to use the IF1 data as normal CABB continuum. Flux density calibration data, using 1934-638, can be obtained from the files 2016-03-04\_2249.RK12QR (for 4cm) and 2016-03-04\_2334.RK12QR (for 16cm). Both files can probably be used for all subsequent RA runs this session.
