

Recording DAS1 to the Xcube disk.

Tied array is 12345, reference antenna was CA04 on W104.

The array needed to be set up at the beginning of this experiment, and was only producing useful C-band data from the start of the recording at 11:05:52 UTC.

After the change to L-band, the array was producing useful data at 11:30:30 UTC.
