

The cryos are working again and we have one channel which appears to be behaving normally at ~400 Jy (LCP). RCP is high at ~2000 Jy. It looks like this is an issue with the LNA and can't be corrected today. We seem to be getting some in-band interference too....

DAS Profile PST16ULF.PRO (AGC off)

Agilent 4.1 GHz

SML01 592 MHz

Coherence seen with tones of 165.5 MHz (Bandsplitter) and 166.5 MHz (Fine tuner)

Recorded to ATNF V010A

Weather, overcast, wind increasing from 15 to to 40 km/h
