

The first 12 hrs of data for v190d is recorded to V002,B1-7

This is xraid0 and xraid1 on mpvsi2.

(N.B. This is a change from the suggested V002, A1-7.)

Only 1 bigbuf level low error for xraid0. But 14 files on 1-sec and 3 on the 2-sec boundaries.

Only 4 bigbuf level low error for xraid1. However, there are a few files with names not on the 0-second boundary!?

(~47 on the 1-sec and 6 on the 2-sec.)

The second 12 hrs of data for v190d is recorded to V002,A1-7

This is xraid2 and xraid3 on mpvsi2.

(N.B. This is a change from the suggested V002, B1-7.)
