

Tied array includes 12345.

Recording to disk ATNF V002A on cavsi1. Had to swap disks that used to be on cavsi1 out before this experiment.

Windstowed at 21:05, back onsource at 22:26.

During windstow we detached antenna 2 from the array for cryo maintenance. After the windstow, the tied array does not include CA02.

CA02 was put back in the tied array at 03:15. It was taken out again at 07:00, and put back in at 12:43.
