

Recording DAS1 to Xcube disks.

Tied array is 12345, reference antenna is CA03 on W104.

During fringe testing, started with vsop_n.pro DAS profile, but swapped to vsop.pro (for testing purposes) at 20:37 UT, and swapped back to vsop_n.pro at 20:55 UT.

No fringes were achieved during the fringe testing period for this schedule. Primary causes were weather, and short scheduling of 0537-441.

Stowed between 00:05-00:45, 1:45-3:39 UT

From 3:39 UT CA03 was detached, tied array is 1245

No data for IF2 after 06:35 - block 27 offline
