

Das Profile: 64MH\_f.pro

2nd LO: 245 MHz (for sky freq. 1410 MHz)

LCP only recording to Ch2

Recorded to ATNF V011\_A1-7 mounted as /data/xraid1

Note: No Tsys table is available for the 70m L-band receiver at the moment

DOY 327

14:56:04 on source for about 5 minutes

15:01:26 stopped

15:12:03 on source again

15:22:30 no fringe to Tid while AT-PKS see fringes

15:40:30 still no fringes

16:21 change DAS profile to 64MHz\_n.pro

16:25:40 no fringe

16:27:40 no fringe

The source may be just too weak for us looking at the edge of the band. I am afraid we should just leave as it is for now. Hopefully tomorrow's observation will have some small overlap with fringe finder scan at the start.

18:21:49 stow
