

ATNF recorders all died/hung at mode change at 15:12:48 UT. Restarted manually recording channels 5-8 for mode v490c.1cm

Mopra recording restarted at 15:34:16

Manually changed channels and stopped/started recording at 18:45:00 mode change.

At 19:12 noticed Tsys was 0 for 3rd IF/pol. Monica was reporting too high A2 GTP (~6.5) and too low SDO (0). increased fine attenuation by 1 to fix, but we were just finishing sources at that point anyway. Levels fine for next source - Jo.

Manually changed channels and stopped/started recording at 19:29:55 mode change.
